# Internet seminars

## electronic communication...

Part I is an introduction to using Bear Mail (the student e-mail system) and electronic discussion forums (listserv's). Part II is an introduction to Usenet Newsgroups using Newswatcher and Netscape.

## netscape basics

An introduction to the World Wide Web using the Netscape web browser, including creating, saving and using your own Netscape bookmarks, understanding and using URL's, and using some search engines.

## home pages

Learn how to activate your student web account, about the basics of HTML, how to use Claris Home Page to create a home page, how to store your page in your web account, and about the standards to follow when creating Baylor home pages.

## search engines

A more in-depth look at Internet Search engines so you can more effectively find relevant and useful information from the Internet.

class	date	time
Creating Home Page	Sept. 11	4:00pm - 5:30pm
Creating Home Page	Oct. 9	4:00pm - 5:30pm
